Transport, Storage Conditions and Shelf Life Information

Temperature during transport:	≤25°C
Temperature during storage:	≤25°C, cool dry places, free from odour. Humidity not exceeding 65%
Shelf life from production	<p>Option 1: 25kg Bags: 18 months from date of production, under described storage conditions</p> <p>Option 2: FIBC: 12 months from date of production, under described storage conditions.</p>

Identification and traceability

Each production is assigned a 6-digit Batch number, which is relevant to date of production i.e. 3rd March 2017 would be 030317. All documents and traceable production records will reference the production batch number.

Traceability is guaranteed for each step of the manufacturing process in accordance with EC178:2002

Each sales unit is also marked with the company EC Health Mark for traceability within EC.

Manufacturing Process

Skimmed milk powder is obtained by the partial removal of water from skimmed milk, through the process of Spray Drying. The final resulting Powder is confirmed on C of A as Medium-Heat SMP.

HACCP

HACCP has been developed and implemented in accordance with the 12 Steps of the Codex Alimentarius Commission Recommended International Code of Practice – General principles of Food Hygiene CAC/RCP 1-1969, Rev 4 – 2003.

All documentation available on request.
